PrivatAir adds Four Aircraft to its Growing Fleet

PrivatAir, the leading international business aviation group, has added four new aircraft to its charter and managed fleet. The additional aircraft, a **Gulfstream II** and **Gulfstream IV-SP** based in Stratford, CT (BDR), a **Citation S-II** based in Teterboro, NJ (TEB) and a **Hawker 125-800** based in Van Nuys, CA (VNY), are now available for client charter.

PrivatAir operates a very diverse fleet from sixteen bases in the United States and Switzerland. PrivatAir's fleet includes Boeing Business Jets (BBJ's), Gulfstreams, Challengers, Learjets, Hawkers, Citations and King Airls.

"More and more private jet owners are realizing the benefit of our aircraft management operation," said David Hurley, CEO of PrivatAir. "Having a jet under management with PrivatAir is a win-win situation. We not only eliminate all concerns associated with the aircraft, crew and maintenance, but we also minimize the cost of ownership through our charter network."

As a result of that market awareness and planned expansion to the European Market in 2003, the company expects to add at least one or two new aircraft to their charter fleet each month in the next five years.

PrivatAir offers a complete ensemble of aircraft flight services. Whether it is the purchase or sale of an aircraft, aircraft management, charter or corporate shuttles, PrivatAir has the experience and expertise to fulfill the needs of corporations and private individuals worldwide.
